Inspection 1 around 3 months

Plot Inspections for Cultivation of Plots Excluding New Members Plots

Late April, June and October

Cultivation Lack of cultivation
 Warning 4 weeks to improve 3 warning = termination without right to remedy
 Termination 2 weeks to remove personal effects
 Extenuating Circumstance Increase time to improve

* The issuing of the termination letter can be waived at the discretion of the committee for extenuating circumstances where there is a reasonable chance of those circumstances improving.

What Do we mean by cultivation?

Cultivation is the working of the allotment for the growing of crops and raising plants.

Depending on the time of the year we expect to see evidence of cultivation as follows:

Spring

Preparation of the Ground
 Raising of Seedlings
 Planting and sowing in the ground

Summer

Crops growing in the soil and/or Greenhouse
 Crops being harvested

Autumn

Crops growing and being harvested

Winter

Preparation of soil

Tidy up for next season

Covering over the ground with Black plastic is one way to keep the soil warm in cooler seasons before the crops go in.

An allotments that is still covered over in the height of summer is not cultivated.

Strimming of weeds is not considered cultivation.
